

Industrial Bearing Range

FROM
extra large diameter roller
bearings

TO

**precision miniature ball
bearings**

and everything in between....

mounted bearing units

widest range available

► *stainless steel housing and insert
bearing*

► *plastic bearing units with stainless
steel insert bearing*

► *triple sealed bearing units*

Longlife Bearing Series

*Achieve longer life even when lubricant
is contaminated*

► *LH spherical roller bearings*

► *EA large size, long operating life
bearings*

► *ECO top tapered roller bearings*
► *TAB deep groove ball bearings*

**sealed self-aligning roller
bearings**

*allows for longer service intervals in
dusty environments.*

**Linear motion guidance
systems**

precision & rolled ball screws
precision ball screws including high speed,

super precision bearings for machine tools

angular contact precision ball bearings with ceramic balls
Super high revolution dn value 2,100,000 using air-oil lubrication.

insulated bearings
designed to prevent electrolytic corrosion in electric motors

constant velocity joints for industrial applications

easy assembly/ disassembly type constant velocity joints

needle roller bearings, cam followers and roller followers

low noise and dust proof designs

► *special environment ball screws*

cam and roller followers

Linear ball bushings and guides

Linear motion rail type guides

Large 4 row cylindrical roller bearings

full compliment cylindrical roller bearings series 'SL'

solid lubricant bearings
*featuring thermo hardened solid
lubricant that lubricates and prevents
deterioration caused by moisture or dirt.*
